

I have been a subscriber to satellite radio for almost 2 years. It is the best thing ever to happen to radio. It has a wide variety of music, talk shows, news and weather. Unlike terrestrial radio, I can drive anywhere in the country and NEVER lose my signal.

Now that satellite radio is threatening terrestrial radio, the NAB is trying to eliminate competition by attempting to use government regulation to interfere with satellite radio services. Please DO NOT allow the NAB to regulate what I am allowed to hear on my satellite radio. Please allow satellite radio to continue broadcasting it's full content, including weather and traffic.
